

CERTIFICATE OF CALIBRATION

X-Series Spectrometer

EQUIPMENT INFORMATION

Model: X-200

Spectral Range: 350-1050 nm

Serial Number:

Date of Manufacture: 2026-03-15

Calibration Date: 2026-04-08

CALIBRATION PARAMETERS

Parameter	Result
Spectral Wavelength	Calibrated
Absolute Spectral Responsivity	Calibrated

✓ Spectral irradiance calibration is performed using the reference spectrometer Instrument Systems CAS 140 (S/N 810714216, NIST-calibrated), and transferred via the reference source Ocean Insight HL-3 Plus (S/N:7003P2352 traceable to NIST), ensuring traceability to the International System of Units (SI).

AUTHORIZATION

CALIBRATION TECHNICIAN

Kiki Luo

REVIEWED BY

Ella Zhang

IMPORTANT NOTICE

Read the User Manual before use. The Spectrometer is factory calibrated. This certificate is issued in accordance with procedure CAL-PAR-001. Measurement results are traceable to NIST and the International System of Units (SI). Please retain this certificate for verification purposes.

XPAR Optical Metrology Laboratory

Document generated: 2026-04-08 14:30:00 | This certificate is valid only for the instrument identified above.
